

# **LUKE BELL**

## **SOFTWARE ENGINEER**

lukekingsleybell@gmail.com | (+44) 74 4686 9568 | [github.com/KingsleyBell](https://github.com/KingsleyBell)

Experienced Backend Engineer with over 7 years of applied experience in system design, application development, and operational stability. Proficient in Python, Golang, Java, and SQL, with a strong foundation in algorithms, data structures, and design patterns.

## **SKILLS**

- **Programming Languages:** Python, Javascript, Go, Java, C++, SQL
- **Frameworks & Tools:** Django, Flask, Docker, Kubernetes, Jenkins, AWS
- **Databases:** MySQL, PostgreSQL, MongoDB
- **System Design:** Microservices, API development, RESTful services
- **Development Practices:** Agile, CI/CD, TDD, Pair Programming
- **Security:** Secure coding practices, application resiliency, data protection
- **Cloud Platforms:** AWS, Google Cloud

## **EDUCATION**

- **University of Cape Town | BSc ComputerScience & Mathematics | 2016**

## **EXPERIENCE**

- **Plentific.com | Senior Backend Engineer | Jul 2021 - Present**
  - Lead the development and maintenance of various microservices, ensuring high performance and scalability.
  - Manage and mentor a team of four backend developers, fostering a collaborative and productive work environment.
  - Technologies: Python, Django, Celery, Docker, Kubernetes (K8s), Jenkins, AWS
- **SPANDIGITAL.com | Backend Engineer | Apr 2020 - Jun 2021**
  - Developed backend services for authentication and scientific data processing, contributing to numerous client projects and internal products.
  - Authored comprehensive technical documentation to streamline development and maintenance processes.
  - Technologies: Python, Golang, Java, Docker, Kubernetes (K8s), AWS
- **Revolut.com | Backend Engineer | Sep 2019 - Mar 2020**
  - Worked in the compliance department to develop a service automating the screening of users and transactions, enhancing security and efficiency.

- Ensured reliability and performance of backend services in a high-stakes financial environment.
  - Technologies: Python, Flask, Docker, Kubernetes (K8s), Google Cloud Platform (GCP), Stackdriver
- 
- **NumberBoost.com | Fullstack Engineer | Jan 2018 - May 2019**
    - Built bespoke machine learning applications and proofs of concept for potential clients, with a focus on optical character recognition and object detection.
    - Developed full-stack solutions, from backend services to frontend interfaces.
    - Technologies: Python, Django, Flask, Celery, Docker, Docker-Compose, AWS, GCP
- 
- **Flickswitch.co.za | Fullstack Engineer | Jan 2017 - Jan 2018**
    - Assisted in the development of a new platform for managing cellular data plans at scale, improving user experience and operational efficiency.
    - Built and maintained external API integrations and developed a rule engine for automated recharges.
    - Technologies: Python, Django, Celery, Docker, Kubernetes (K8s), Prometheus, GCP
